# PT MATHS 7

## Individual student report for teachers
## UK standardisation

# Individual student report for teachers

| **School:** Academica Británica Cuscatleca | |
|---|---|
| **Group:** 2nd borgo | **No. of students:** 23 |
| **Period of testing:** 07/10/2025 – 16/10/2025 | **Form:** B |

## What is *Progress Test in Maths*?

The *PTM* series consists of two Forms: the original form (Form A), and the new form (Form B). Form A consists of 12 tests: 11 tests covering the age range 5 to 15+ years (*Progress Test in Maths* 5 to 15), plus an additional test for pupils aged between 11 and 12 years, which can be used as a transition test on entry to secondary education (*Progress Test in Maths* 11T). Form B consists of 9 tests covering the age ranges 6 to 15+ years.

## Why use *Progress Test in Maths*?

*Progress Test in Maths (PTM)* can be used for both formative and summative purposes to identify strengths and weaknesses in students' maths skills and knowledge, and to plan teaching and learning strategies, targeted support, and extension work for groups and individuals. Using *PTM* year-on-year provides accurate and reliable information on students' attainment and progress in key maths competencies.

The Standard Age Score (SAS) is a reliable measure for ensuring that monitoring is accurate and based on relevant test content, and that students are making good progress.

## Relationship between scores

| Description | Very Low | Below Average | | Average | | | Above Average | | Very High |
|---|---|---|---|---|---|---|---|---|---|
| Stanine (ST) | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

| Standard Age Score (SAS) | 70 | 80 | 90 | 100 | 110 | 120 | 130 |
|---|---|---|---|---|---|---|---|

| Percentile Rank (PR) | 1 | 5 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 95 | 99 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

# Example scores

The **number of questions attempted** can be important: a student may have worked very slowly but accurately and not finished the test and this will impact on his or her results.

The **Standard Age Score (SAS)** is the most important piece of information derived from *PTM*. The SAS is based on the student's raw score which has been adjusted for age and placed on a scale that makes a comparison with the standardisation sample of students of the same age. The average score is 100. The SAS is key to benchmarking and tracking progress and is the fairest way to compare the performance of different students within a year group or across year groups.

The **Stanine (ST)** places the student's score on a scale of 1 (low) to 9 (high) and offers a broad overview of his or her performance.

The **Group Rank (GR)** shows how each student has performed in comparison to those in the defined group. The symbol = represents joint ranking with one or more other students.

| No. attempted (/50) | SAS | SAS (with 90% confidence bands) 60 70 80 90 100 110 120 130 140 | Overall ST | PR | GR (/30) | End of KS2 indicator | Progress Category |
|---|---|---|---|---|---|---|---|
| **50** | 105 | | 5 | 62 | 13 | 105 | Expected |

Performance on a test like *PTM* can be influenced by a number of factors and the **confidence band** is an indication of the range within which a student's scores lies. The narrower the band the more reliable the score. This means that 90% confidence bands are a very high level estimate. The dot represents the student's SAS and the horizontal line represents the confidence band. The yellow shaded area shows the average score range.

The **Percentile Rank (PR)** relates to the SAS and indicates the percentage of students obtaining any particular score. PR of 50 is average. PR of 5 means that the student's score is within the lowest 5% of the standardisation sample; PR of 95 means that the student's score is within the highest 5% of the standardisation sample.

The **end of KS2 indicators** show where future scaled scores and attainment may lie when the student takes the national tests for **Maths**.

**Progress** between administrations of *PTM* has been measured and is expressed as much higher than expected, higher than expected, expected, lower than expected and much lower than expected.
