## Analysis of Curriculum content categories

| Curriculum content category | Number of questions | Student % correct | Standardisation % correct | Student / standardisation difference |
|-----------------------------|---------------------|-------------------|---------------------------|--------------------------------------|
| Number                      | 30                  | 49%               | 48%                       | 1%                                   |
| Measurement                 | 9                   | 60%               | 46%                       | 14%                                  |
| Geometry                    | 3                   | 17%               | 43%                       | -26%                                 |
| Statistics                  | 4                   | 40%               | 48%                       | -8%                                  |

## Analysis of Process categories

| Process category                    | Number of questions | Student % correct | Standardisation % correct | Student / standardisation difference |
|-------------------------------------|---------------------|-------------------|---------------------------|--------------------------------------|
| Fluency in facts and procedures     | 14                  | 29%               | 54%                       | -25%                                 |
| Fluency in conceptual understanding | 14                  | 50%               | 44%                       | 6%                                   |
| Problem solving                     | 4                   | 60%               | 38%                       | 22%                                  |
| Mathematical reasoning              | 14                  | 57%               | 47%                       | 10%                                  |

## Implications for teaching and learning

---

- By comparing scores from a previous administration of *PTM* it is possible to categorise progress as expected, higher or lower than expected or much higher or much lower than expected.
  - María Fernanda took *PTM7B* in November 2024 and from then until now has made expected progress in maths.
- Reviewing the *Analysis of Curriculum content categories* will help to identify where there are specific strengths and weaknesses and to plan next steps.
- María Fernanda will generally demonstrate a level of understanding of mathematical concepts appropriate for this age. María Fernanda is developing the language of mathematics broadly in line with expectations for her age group. Fluency and agility are however less well developed in mental maths.
- Where they occur, specific areas of weakness might be addressed as follows:
  - Further targeted practice in the areas identified as being relatively weaker.
  - Practical activities using equipment that is designed to help María Fernanda to 'see' the thinking that lies behind any concepts that are not yet secure.
  - Get María Fernanda to explain workings to another pupil so that any misconceptions can be highlighted and corrected through discussion.
- María Fernanda is reasonably secure in performing the basic mental calculations expected for this age group and has performed above average in this aspect. These include fluency with whole numbers and the four operations, including number facts and the concept of place value.
- Next steps may include ensuring mental and oral opportunities are planned across the range of mathematics and encouraging María Fernanda to make the links between the mental calculations and the written explanations. María Fernanda should aim to consolidate skills that are in place and practise those that are missing.
- By providing practice time and frequent opportunities for María Fernanda to use one or more known facts to work out more facts, and by engaging María Fernanda in discussion and providing opportunities to explain methods and strategies to you and her peers, María Fernanda will be helped to make the connections between mental calculations and the written explanations.
- Make sure that María Fernanda begins to use the written language for mathematics to aid mental agility. The setting out of written calculations in the correct way is fundamental to success and can aid understanding. For example, an understanding of place value is consolidated by setting out calculations in columns. Correct setting out can be used to explore with María Fernanda ways of undertaking these calculations without writing down the whole of the sum. This can increase confidence and support progress in mental maths.

## Analysis by question

The table below shows each question in the test and the pupil's response (correct/incorrect) compared with the group and standardisation average.

| Question number | Curriculum category | Process category                    | Question content                                                                                                          | Score (/x) | Group % correct | Standardisation % correct |
|-----------------|---------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------|------------|-----------------|---------------------------|
| MM1             | Geometry            | Fluency in facts and procedures     | How many corners does a rectangle have?                                                                                   | 0 / 1      | 58              | 71                        |
| MM2             | Number              | Fluency in facts and procedures     | What is one less than thirty?                                                                                             | 1 / 1      | 67              | 75                        |
| MM3             | Number              | Mathematical reasoning              | What is half of ten?                                                                                                      | 1 / 1      | 88              | 93                        |
| MM4             | Number              | Mathematical reasoning              | Write a multiple of five that is less than twenty-five.                                                                   | 1 / 1      | 67              | 65                        |
| MM5             | Number              | Fluency in conceptual understanding | Write in figures the number three hundred and seventy-two.                                                                | 0 / 1      | 54              | 63                        |
| MM6             | Number              | Fluency in conceptual understanding | A cake is divided into four. How many pieces are there?                                                                   | 1 / 1      | 58              | 62                        |
| MM7             | Number              | Mathematical reasoning              | Look at the numbers in your booklet. Write the next two numbers.                                                          | 1 / 1      | 33              | 30                        |
| MM8             | Number              | Fluency in facts and procedures     | What is three multiplied by seven?                                                                                        | 0 / 1      | 25              | 37                        |
| MM9             | Measures            | Mathematical reasoning              | How many five pence coins make twenty pence?                                                                              | 0 / 1      | 33              | 62                        |
| MM10            | Geometry            | Fluency in facts and procedures     | How many sides does a pentagon have?                                                                                      | 0 / 1      | 13              | 43                        |
| MM11            | Measures            | Fluency in facts and procedures     | I have a fifty pence coin, a twenty pence coin, a five pence coin and two one pence coins. How much do I have altogether? | 1 / 1      | 67              | 71                        |
| MM12            | Number              | Fluency in facts and procedures     | Add the numbers twenty-six, eleven and thirty-four.                                                                       | 0 / 1      | 21              | 20                        |
| MM13            | Number              | Fluency in conceptual understanding | Eleven children are each given seven sweets. How many sweets are there altogether?                                        | 0 / 1      | 21              | 36                        |
| MM14            | Number              | Fluency in conceptual understanding | Look at the numbers in your booklet. Write down every odd number.                                                         | 0 / 1      | 42              | 61                        |
| MM15            | Measures            | Mathematical reasoning              | How many days are there in five weeks?                                                                                    | 0 / 1      | 8               | 34                        |
| AU1a            | Number              | Fluency in facts and procedures     | Using the three numbers below, fill in the blank spaces of three sums to make totals of 100.                              | 0 / 1      | 38              | 65                        |
| AU1b            | Number              | Fluency in facts and procedures     | What is the missing number?                                                                                               | 0 / 1      | 54              | 62                        |
| AU2a-c          | Number              | Fluency in conceptual understanding | Lauren's house number is bigger than 25, less than 47 and an odd number.                                                  | 2 / 2      | 38              | 43                        |

| Question number | Curriculum category | Process category                    | Question content                                                                                                                            | Score (/x) | Group % correct | Standardisation % correct |
|-----------------|---------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|------------|-----------------|---------------------------|
| AU2d            | Number              | Mathematical reasoning              | Lauren's house number can be divided by 3. Circle Lauren's house number.                                                                    | 1 / 1      | 38              | 51                        |
| AU3             | Number              | Fluency in facts and procedures     | Count the number of bricks in each pile. Circle the 2 piles that have 11 bricks in total.                                                   | 1 / 1      | 88              | 84                        |
| AU4             | Number              | Fluency in facts and procedures     | Circle the 3 piles that have 15 bricks in total.                                                                                            | 0 / 1      | 88              | 80                        |
| AU5             | Number              | Fluency in facts and procedures     | Here are some more bricks. They are put into 6 equal piles. How many bricks are there in each pile?                                         | 0 / 1      | 25              | 42                        |
| AU6a-c          | Number              | Fluency in conceptual understanding | Select the shape that is $\frac{2}{8}$ shaded. Select the shape that is $\frac{1}{2}$ shaded. Select the shape that is $\frac{1}{4}$ shaded | 0 / 2      | 8               | 27                        |
| AU6d            | Number              | Fluency in conceptual understanding | Which 2 fractions are the same size?                                                                                                        | 0 / 1      | 13              | 38                        |
| AU7a            | Measures            | Fluency in conceptual understanding | How much money does she have?                                                                                                               | 0 / 1      | 8               | 25                        |
| AU7b            | Measures            | Mathematical reasoning              | Arjun has £6.97. He buys some sweets that cost £3.42. How much money does he have left?                                                     | 1 / 1      | 33              | 46                        |
| AU8             | Geometry            | Fluency in facts and procedures     | Draw lines to join the shapes to their names.                                                                                               | 1 / 4      | 29              | 36                        |
| AU9             | Number              | Mathematical reasoning              | Make the addition calculation with the largest possible answer.                                                                             | 0 / 1      | 29              | 29                        |
| AU10            | Number              | Mathematical reasoning              | Now make the addition calculation with the smallest possible answer.                                                                        | 1 / 1      | 46              | 42                        |
| AU11            | Number              | Problem solving                     | Now make the subtraction calculation with the largest possible answer.                                                                      | 0 / 1      | 8               | 29                        |
| AU12a           | Number              | Fluency in conceptual understanding | Fill in the table to show how many squares make up each L-shape.                                                                            | 1 / 1      | 50              | 47                        |
| AU12b           | Number              | Mathematical reasoning              | How many squares do you need to make L-shape 4?                                                                                             | 0 / 1      | 42              | 39                        |
| AU13            | Statistics          | Fluency in conceptual understanding | How many children have each number of pencils in total?                                                                                     | 0 / 2      | 13              | 39                        |
| AU14            | Number              | Fluency in conceptual understanding | Here is a number spider for 24. The calculations at the end of each 'leg' should make 24. Some are wrong.                                   | 3 / 3      | 53              | 54                        |
| AU15            | Measures            | Mathematical reasoning              | Rachel is 90 centimetres tall. Her teacher is twice as tall as she is. How tall is Rachel's teacher?                                        | 1 / 1      | 25              | 51                        |
| AU16            | Measures            | Problem solving                     | One carrot weighs 50 grams. It weighs the same as 10 raspberries. How much does 1 raspberry weigh?                                          | 1 / 1      | 29              | 49                        |
| AU17            | Measures            | Problem solving                     | One orange weighs 60 grams. One grape weighs 5 grams. How many grapes weigh the same as 1 orange?                                           | 0 / 1      | 46              | 54                        |
| AU18            | Measures            | Fluency in conceptual understanding | The top pencil is 5 centimetres long. How long are the other pencils?                                                                       | 2 / 2      | 33              | 32                        |
| AU19i           | Number              | Fluency in facts and procedures     | Levi has some calculations to do for his homework.                                                                                          | 1 / 1      | 79              | 64                        |
| AU19ii          | Number              | Fluency in conceptual understanding | Levi has some calculations to do for his homework.                                                                                          | 0 / 1      | 25              | 32                        |
| AU19iii         | Number              | Fluency in facts and procedures     | Levi has some calculations to do for his homework.                                                                                          | 0 / 1      | 54              | 58                        |
| AU19iv          | Number              | Mathematical reasoning              | Levi has some calculations to do for his homework.                                                                                          | 0 / 1      | 25              | 28                        |
| AU20            | Number              | Problem solving                     | Nine children share a bag of sweets. Each child has 5 sweets and there are 3 sweets left. How many sweets were in the bag?                  | 2 / 2      | 29              | 29                        |

| Question number | Curriculum category | Process category                    | Question content                                      | Score (/x) | Group % correct | Standardisation % correct |
|-----------------|---------------------|-------------------------------------|-------------------------------------------------------|------------|-----------------|---------------------------|
| AU21            | Statistics          | Fluency in conceptual understanding | Which author is the most popular in Zain's school?    | 1 / 1      | 71              | 80                        |
| AU22a           | Statistics          | Mathematical reasoning              | How many pupils chose Jeff Kinney as their favourite? | 1 / 1      | 33              | 51                        |
| AU22b           | Statistics          | Mathematical reasoning              | How many pupils took part in the survey?              | 0 / 1      | 13              | 31                        |
