Group report for teachers

School: Academica Británica Cuscatleca	
Group: 4TH GRADE OCTOBER 25	No. of students: 102
Period of testing: 10/10/2025 – 14/10/2025	Form: B

What is *Progress Test in Maths*?

The *PTM* series consists of two Forms: the original form (Form A), and the new form (Form B). Form A consists of 12 tests: 10 tests covering the age range 5 to 15+ years (*Progress Test in Maths* 5 to 15), plus an additional test for pupils aged between 11 and 12 years, which can be used as a transition test on entry to secondary education (*Progress Test in Maths* 11T). Form B consists of 9 tests covering the age ranges 6 to 15+ years.

Why use *Progress Test in Maths*?

Progress Test in Maths (PTM) can be used for both formative and summative purposes to identify strengths and weaknesses in students' maths skills and knowledge, and to plan teaching and learning strategies, targeted support, and extension work for groups and individuals. Using *PTM* year-on-year provides accurate and reliable information on students' attainment and progress in key maths competencies.

In addition to helping the teacher track the progress of individual students, *PTM* allows the school to compile an essential database of maths attainment. If *Progress Test in Maths* is used from start of school on an annual basis, the resulting profile of student and group attainment can help support the school's aim of raising standards in maths.

The Standard Age Score (SAS) is a reliable measure for ensuring that monitoring is accurate and based on relevant test content, and that students are making good progress.

Relationship between scores

Description	Very Low		Below Average		Average			Above Average		Very High			
Stanine (ST)	1		2	3	4	5	6	7	8	9			
Standard Age Score (SAS)	70		80		90	100	110	120		130			
Percentile Rank (PR)	1	5	10	20	30	40	50	60	70	80	90	95	99

School: Academica Británica Cuscatleca	
Group: 4TH GRADE OCTOBER 25	No. of students: 102
Period of testing: 10/10/2025 – 14/10/2025	Form: B

Analysis of group scores (all students)

The table and bar chart below show the distribution of scores for the group against the standardisation average.

Description	Very low	Below average		Average			Above average		Very high
SAS bands	<74	74–81	82–88	89–96	97–103	104–111	112–118	119–126	>126
Standardisation average	4%	7%	12%	17%	20%	17%	12%	7%	4%
All students	3%	22%	28%	22%	17%	5%	2%	1%	1%

The table below shows the mean scores with confidence bands for the group against the standardisation average.

	No. of students	Mean SAS	SAS (with 90% confidence bands)											
			60	70	80	90	100	110	120	130	140			
Standardisation average	-	100.0												
All students	102	89.5												

School: Academica Británica Cuscatleca	
Group: 4TH GRADE OCTOBER 25	No. of students: 102
Period of testing: 10/10/2025 – 14/10/2025	Form: B

Analysis of group scores (by gender)

The table and bar chart below show the distribution of scores for the group, males and females, against the standardisation average.

Description	Very low	Below average		Average			Above average		Very high
SAS bands	<74	74–81	82–88	89–96	97–103	104–111	112–118	119–126	>126
Standardisation average	4%	7%	12%	17%	20%	17%	12%	7%	4%
All students	3%	22%	28%	22%	17%	5%	2%	1%	1%
Males	5%	14%	26%	26%	19%	7%	2%	2%	0%
Females	2%	27%	31%	19%	15%	3%	2%	0%	2%

The mean standard age score for males is not significantly different from that of the females.

The table below shows the mean scores with confidence bands for the group, males and females, against the standardisation average.

	No. of students	Mean SAS	SAS (with 90% confidence bands)									
			60	70	80	90	100	110	120	130	140	
Standardisation average	-	100.0										
All students	102	89.5										
Males	43	90.9										
Females	59	88.6										

School: Academica Británica Cuscatleca	
Group: 4TH GRADE OCTOBER 25	No. of students: 102
Period of testing: 10/10/2025 – 14/10/2025	Form: B

Analysis of group scores (by Curriculum content category)

The table and chart below show the percentage of questions answered correctly by all students compared with those for the standardisation average.

Curriculum content category	Number of questions	Group % correct	Standardisation % correct	Difference
Number	38	48%	62%	-14%
Measurement	6	32%	47%	-15%
Geometry	4	30%	40%	-10%
Statistics	6	52%	63%	-11%

School: Academica Británica Cuscatleca

Group: 4TH GRADE OCTOBER 25

No. of students: 102

Period of testing: 10/10/2025 – 14/10/2025

Form: B

Analysis of group scores (by Process category)

The table and chart below show the percentage of questions answered correctly by all students compared with those for the standardisation average.

Process category	Number of questions	Group % correct	Standardisation % correct	Difference
Fluency in facts and procedures	13	54%	64%	-10%
Fluency in conceptual understanding	22	50%	64%	-14%
Problem solving	7	23%	34%	-11%
Mathematical reasoning	12	40%	57%	-17%

Percentage of questions answered correctly by all students compared with the standardisation average

Group: 4TH GRADE OCTOBER 25	No. of students: 102
Period of testing: 10/10/2025 – 14/10/2025	Form: B

Analysis of group scores (by question)

The chart below shows each question and the percentage correct for the group compared with the standardisation average.

School: Academica Británica Cuscatleca	
Group: 4TH GRADE OCTOBER 25	No. of students: 102
Period of testing: 10/10/2025 – 14/10/2025	Form: B

The table below shows each question and the percentage correct for the group compared with the standardisation average (by standardisation % correct).

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
AU15a	Number	Fluency in facts and procedures	Which is the biggest number?	93	94	-1
AU16a	Number	Fluency in facts and procedures	Which are the smallest two numbers in the list?	98	93	5
AU1	Number	Fluency in conceptual understanding	Draw lines to connect the matching fractions.	91	89	2
MM1	Number	Fluency in facts and procedures	What is six doubled?	69	87	-18
AU15b	Number	Fluency in facts and procedures	Write in a number that is bigger than the biggest number here.	84	86	-2
AU24	Number	Mathematical reasoning	What is the smallest possible number you can make using all 4 of these cards?	80	84	-4
AU9	Statistics	Fluency in conceptual understanding	Put a circle round the country that has the least tigers.	76	83	-7
AU12a	Number	Fluency in conceptual understanding	Which number has 7 as its hundreds digit?	71	83	-12
AU10	Statistics	Fluency in conceptual understanding	Roughly how many tigers are there in Malaysia?	79	81	-2
AU12d	Number	Fluency in conceptual understanding	Which is the smallest number?	77	81	-4
MM7	Number	Mathematical reasoning	One car has four tyres. How many tyres do three cars have?	59	80	-21
AU2	Number	Fluency in conceptual understanding	What fraction of this shape is shaded?	34	78	-44
AU13	Number	Fluency in facts and procedures	Here is a number machine. Fill in the missing number.	78	74	4
AU16b	Number	Mathematical reasoning	Write in any whole number that is between the 2 smallest numbers.	60	74	-14
AU20	Number	Fluency in conceptual understanding	What number is exactly halfway between $\frac{2}{7}$ and $\frac{4}{7}$?	47	71	-24
AU11	Statistics	Fluency in conceptual understanding	Put a circle round the 3 countries that have less than 500 tigers.	70	70	0
AU12c	Number	Fluency in conceptual understanding	Which number is not a whole number?	62	70	-8
AU29	Statistics	Fluency in conceptual understanding	Put an x on the graph in question 17 to show John's heartbeat.	55	70	-15
AU17	Measures	Fluency in conceptual understanding	Which two of these are equal to seventy pence?	46	68	-22
MM9	Number	Fluency in conceptual understanding	What is twenty-five take away thirteen?	52	66	-14
AU14a	Number	Mathematical reasoning	Fill in the missing number.	69	66	3

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
MM4	Number	Mathematical reasoning	A packet of forty-five sweets is shared equally between five people. How many sweets does each person get?	21	64	-43
MM11	Number	Fluency in conceptual understanding	Look at these numbers. Write down all the odd numbers.	45	64	-19
MM2	Number	Fluency in facts and procedures	Multiply three by seven.	52	63	-11
MM3	Number	Fluency in conceptual understanding	Write in figures the number four thousand and thirty-six.	33	63	-30
AU12b	Number	Fluency in conceptual understanding	Which number is 10 times bigger than 62?	28	63	-35
AU7	Number	Mathematical reasoning	Here are 3 more fraction sums that make 1 whole. Fill in the missing numbers.	22	62	-40
MM14	Measures	Mathematical reasoning	I have twenty-seven pence. I want to spend thirty-five pence. How much more money do I need?	53	61	-8
AU6a	Geometry	Fluency in facts and procedures	In which labelled shape are all the angles right angles?	50	60	-10
AU3a	Number	Fluency in conceptual understanding	Which day had the lowest midnight temperature?	54	59	-5
AU25	Number	Problem solving	Arrange the cards to make 2 numbers whose sum is 74.	49	57	-8
MM5	Number	Fluency in facts and procedures	A cake is cut into thirds. How many pieces are there?	64	56	8
MM8	Number	Mathematical reasoning	There are six eggs in one box. How many eggs are there in seven boxes?	15	52	-37
AU19	Number	Fluency in conceptual understanding	What number is exactly between 4.5 and 5.5?	35	51	-16
AU3b	Number	Fluency in conceptual understanding	Which day had a midnight temperature 1 degree higher than Friday?	42	50	-8
AU4	Number	Mathematical reasoning	On Sunday the midnight temperature was -2 degrees. The next day, the midnight temperature was 5 degrees higher. What was it?	40	49	-9
MM15	Measures	Fluency in facts and procedures	How many days are there in eight weeks?	10	47	-37
AU22	Number	Mathematical reasoning	Now choose 4 different numbers to show more multiplications with the answer 32.	27	47	-20
AU5	Geometry	Fluency in facts and procedures	Name the 3 shapes that are labelled.	29	46	-17
MM10	Number	Fluency in facts and procedures	Write a multiple of six that is between fifteen and twenty-five.	17	44	-27
MM12	Number	Fluency in facts and procedures	Add these numbers: forty-one, twenty-five and fourteen.	24	43	-19
AU6b	Geometry	Fluency in facts and procedures	In which labelled shape are all the angles greater than a right angle?	33	42	-9
AU14b	Number	Problem solving	What number comes out the same as it goes in?	37	40	-3
AU28	Statistics	Fluency in conceptual understanding	How many babies were at the medical centre on that Wednesday?	19	40	-21
MM13	Number	Mathematical reasoning	There are thirty-two people in a restaurant. Thirteen are adults. How many are children?	22	36	-14
AU8	Measures	Mathematical reasoning	Write the times in the correct boxes.	46	36	10

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
AU26	Number	Problem solving	Arrange the cards to make 2 numbers whose difference is 26.	27	35	-8
AU30	Statistics	Problem solving	Which 2 of these age groups could Erin be in?	12	33	-21
AU18	Number	Fluency in conceptual understanding	What number is exactly between 41 and 55?	24	31	-7
AU21	Geometry	Problem solving	Write the letters of each shape into the correct boxes.	22	31	-9
AU23	Measures	Fluency in conceptual understanding	At the bank, Mr Smith changes a £10 note for 20p pieces. How many 20p pieces does he get?	8	29	-21
MM6	Measures	Fluency in conceptual understanding	My watch says half past two in the afternoon. What would a twenty four hour digital watch say?	3	28	-25
AU27b	Number	Problem solving	How many more invitations can she make with the left-over stickers?	9	24	-15
AU27a	Number	Problem solving	How many stickers will be left when she has made all the cards?	12	21	-9

AU2	Number	Fluency in conceptual understanding	What fraction of this shape is shaded?	34	78	-44

Student profiles

To understand how different pupils have performed on *PTM*, it may be helpful to group together those with a different profile of scores. Although it is important to focus on overall performance, it is possible to differentiate between pupils whose performance is 'Low' (Stanines 1, 2 & 3), 'Medium' (Stanines 4, 5 & 6) and 'High' (Stanines 7, 8 & 9).

Whilst it may be helpful to consider which pupils fall into which category, this information must be treated with caution as this is based on a single snapshot in time. It should be remembered that children may perform differently on another occasion when being observed by a teacher, and that progression across the different mathematical disciplines will not necessarily be even.

Low performance

- These pupils are performing below national age-related expectations as a group, and their scores vary from very low to below average. It is recommended that individual diagnostic assessments are administered as soon as possible to investigate more precisely where additional support is most needed and to decide on appropriate interventions.
- Pupils with a low score will need to revisit concrete operational methods in order to establish and consolidate an understanding of number (cardinality and ordinality) before moving on to higher order concepts. Concrete objects and measuring tools should be used in practical activities. Teaching should also involve using a range of measures to describe and compare different quantities such as length, mass, capacity/volume, time and money. An ability to estimate and perform 'real life' calculations requires practice and repetition as well as a basic understanding of the decimal system.
- Mental maths skills can be developed by ensuring mental and oral opportunities are planned across the range of mathematics in the curriculum. Starter activities designed to stimulate mental agility will help pupils to overcome any fear of being without a calculator.
- Pupils should be encouraged to write down each step in their calculations to explain how they arrive at their answer using the correct mathematical vocabulary. In this way they can develop their language of mathematics, in particular their abilities to reason, explain and justify, which, in turn, will help them to develop into confident problem solvers. They will also be challenged to see that there are sometimes multiple approaches to arriving at the right answer. This will help development in both the written and mental contexts.
- Pupils should be encouraged to play mathematical games, perform exercises in imagining to develop an understanding of number or shape and space, build confidence through practical applications to real life situations, and practice routine calculations to consolidate their knowledge of multiplication tables. An emphasis on practice will always aid fluency and build confidence.

Students:

Renato Alvarado Trujillo	Julia Paz Aranibar Giuliani	Manuel Sebastián Archila Hernández
Gabriel Bances-Crescente	Diego Nicolás Batres Peña	Antonella Benítez Campos
Santiago Andrés Betancourt Palma	Mateo Calvo García	Lucía Valentina Castillo Mejía
Sofía Isabela Castro Cáceres	Ericsson Enrique Chachagua Escobar	Miranda Alejandra Chacón Roncayolo
Susy Miranda Colindres Gámez	Ariana Magali Cubas Benavidez	Antonella Gabrielle De Franco Perezalonso
Adriana Domingos Coimbra Fernandes	Jassary Maribel Escobar Ruiz	Lia Victoria Fernández Gutiérrez
Alyssa Naomi Figueroa Alvarado	Alexa González Amaya	Lucía Alejandra González Fuentes
María Isabel Guardado Marroquín	Mia Alessandra Guillén Velásquez	Luisa Monserrat Guzmán Gómez
Sophia Valentina Hernández Varaona	Camila Huet Morazán	Santiago José Imberton López
Sebastián Ibrahim Kury Argumedo	Jaime Gabriel Lartategui Velásquez	Daniela Michelle Marroquín Arriola
Gabriel Melara Molina	Ariana Camila Mendoza González	Luke Edward Mentore
Lucas Fernando Mercado Banegas	Natalia Abigail Moncada Sáenz	Daniela Patricia Pitta Silhy
Julieta Valentina Ponce Polanco	María Fernanda Quesada Sandoval	Rebeca Sofía Ramírez Huevo
Natasha Mikaela Ramírez Mena	Mía Isabella Renderos Hernández	Mía Isabella Retana Ventura
Zahir Akil Richards	Santiago Rodríguez Arango	Rodrigo Andrés Rosales Quintanilla
Mia Fernanda Santos García	Christian Gerard Soriano Bonilla	María José Sánchez Arbizú
Alejandro André Tenze Bustamante	Mia Renee Valdivieso Rodezno	María José Velado Barraza
Johanna Sophia Villatoro Aguilar	Lucía Alejandra Zambrana Segovia	Emma Sofía Zúñiga Herrera

Medium performance

- These pupils, as a group, demonstrate a performance that is broadly average and in line with national age-related expectations across the curriculum for mathematics. It is recommended that individual diagnostic assessments are made to investigate more precisely where strengths and weaknesses in different aspects of mathematics lie, and therefore where additional support or greater challenge is most needed.
- An understanding of place value must translate into being able to perform calculations accurately and to write them out in an appropriate form. Developing the written ability to use symbols such as the '=' sign correctly (rather than it being something they write down whilst they are thinking what to do next) is also an important fundamental for applying and understanding maths in its written format.
- Pupils need to build up the language of mathematics in written, oral and mental forms. The methodologies for addition, subtraction, division and multiplication, the need to use units such as cm/m/kg correctly and the need to record intermediate steps in calculations to demonstrate methodology are examples of these requirements. Suggest to pupils that they 'proof read' their answers carefully to check that they make sense.
- Getting pupils to discuss in pairs or groups how they have arrived at their answers will, not only help to consolidate their understanding, but also help them to develop their language of mathematics. They will be required to reason, explain, and justify, which are critical skills in developing mathematical acuity. They will also be challenged to see that there are sometimes multiple approaches to arriving at the right answer, as in the example above. This will help development in both written and mental contexts.

Students:

Moisés Alejandro Argueta Hernández	Camila Farah Arévalo Gil	Santiago Andrés Arévalo Guevara
Solomon Bances-Crescente	Martina Bandini	Víctor André Bardales Hernández
Valeria Valentina Borja Castellón	Sarah Valentina Cabrera Guevara	Ian Ernesto Campos Conde
Mark Adolfo Castaneda Neumann	Santiago Nicolás Chavarría Abullarade	Sofía Contreras Salazar
Nicolás Comejo Zamora	Gaja Culiberg	Silas Marcello DeLia
Maya Angélica Dávalos Ávila	Valentina Escobar Alegría	Fernando Javier Escobar Cabrera
Emma Granados Flores	Flavia María Graniello Álvarez	Juan Gerardo Hasbún Alabí
Sofía Victoria Hernández López	Alazne Landeta Montenegro	Ana Paulina Lemus Olano
Chiara López Alcalá	Astrid Fernanda López García	Ricardo Gabriel López Guevara
Christina Manzanares Menjivar	Mia Valentina Mena López	Solana Audrey Mora
Paul William O'Driscoll Comejo	Miriam Marcela Portillo Cea	Juan Pablo Redaelli López
Rodrigo Reyes Barillas	Walter Santiago Rivas Campos	Matías Samuel Rivas Pacheco
Felipe Rodríguez Arango	Natalia Isabel Saca Simán	Diego Joel Sandoval Rivas
Julieta Evangelina Saravia Huete	Nicolás Sosa Contreras	Ana Cristina Sánchez Arbizú
Ascher Cruz Tidwell	David Yoshito Waldron	

High performance

- These pupils are performing above or significantly above national related expectation for their age group and, as a group, their scores vary from above average to very high. Fluency and agility are better developed for this group than others and they are likely to be more confident in their manipulation of numbers, measures and shapes. They can make connections between measure and number and are developing a secure understanding of fractions.
- Pupils with a high score will want and need to go beyond the answer to a particular problem to raise questions which the answer itself raises. They should be encouraged to discuss different approaches to arriving at the correct answer and to seek generalisations or counter examples depending on the context. Reasoning and conversation lie at the heart of developing problem solving skills; they afford the opportunity to conjecture, hypothesise and test whilst promoting perseverance and resilience.
- Next steps should include opportunities to stretch and develop conceptual understanding, to increase mental agility and to progress the development of formal written mathematics. This can be done by asking pupils to explain methodology and justify answers and procedures. Give them the opportunity to change questions (for example by saying 'What if.....' and then altering some aspect of the set question), to ensure that they develop problem solving skills of reasoning and generalising.
- Provide practice time and frequent opportunities for these pupils to use one or more facts that they already know to work out more facts, and engage them in discussion (perhaps by also providing discussion using common misconceptions). Give opportunities for them to explain their methods and strategies to you and their peers, which will help them to make connections, and develop both their problem solving abilities and their language of mathematics, thus improving both mental agility and written fluency.
- Offering opportunities to be the teacher to a group of other pupils is a good way to help them develop their own understanding.

Students:

Mia Valentina Bansal Reyes	Valentina Renee Denis Ibarra	Hugo Ernesto Menéndez Morales
Luis Felipe Trigueros Dalmau		

School: Academica Británica Cuscatleca	
Group: 4TH GRADE OCTOBER 25	No. of students: 99
Date(s) of first test: 13/11/2024 – 21/11/2024	Level: 8B
Date(s) of second test: 10/10/2025 – 14/10/2025	Level: 9B

Progress profiles

The SAS for the first and second administrations of the test are shown in the diagram. Students who are considered to be making expected progress are in the white band. Students making lower and much lower than expected progress are in the light and the dark orange band and those making higher and much higher than expected progress are in the light and the dark green band respectively.

Note that only those students who have completed two valid administrations of PTM are able to have performance compared and therefore progress reported in this section.

- Much higher than expected progress
- Higher than expected progress
- Expected progress
- Lower than expected progress
- Much lower than expected progress
- Males
- Females

Progress scores for the group (by class / last name)

The table below shows the SAS for the first and second administrations of the test and the resulting SAS difference and progress category. Note that only those students who have completed two valid administrations of PTM are able to have performance compared and therefore progress reported in this section.

Student name	First administration SAS	Second administration SAS	SAS difference	Progress category
Manuel Sebastián Archila Hernández	79	84	5	Expected
Sarah Valentina Cabrera Guevara	81	90	9	Higher
Susy Miranda Colindres Gámez	83	87	4	Expected
Lucía Alejandra González Fuentes	69	74	5	Expected
Mia Alessandra Guillén Velásquez	71	77	6	Expected
Luisa Monserrat Guzmán Gómez	69	78	9	Higher
