

Name: María José Sánchez Arbizú		
School: Academica Británica Cuscatleca		
Group: 4th quin...		Sex: Female
Date of first test: 13/11/2024	Level: 8B	Age: 8:04
Date of second test: 10/10/2025	Level: 9B	Age: 9:03

Scores

No. attempted (/54)	SAS	SAS (with 90% confidence bands)										Overall ST	PR	GR (/25)	End of KS2 indicator	Progress Category
		60	70	80	90	100	110	120	130	140						
43	86											3	18	15	96	Expected

Previous & Current Scores

Date	Age at test (yrs:mths)	Level / Form	No. attempted	SAS	SAS (with 90% confidence bands)										ST	PR	End of KS2 indicator
					60	70	80	90	100	110	120	130	140				
07/05/2025	8:10	9A	36 / 54	81											2	11	93
10/10/2025	9:03	9B	43 / 54	86											3	18	96

Analysis of Curriculum content categories

Curriculum content category	Number of questions	Student % correct	Standardisation % correct	Student / standardisation difference
Number	38	41%	62%	-21%
Measurement	6	50%	47%	3%
Geometry	4	0%	40%	-40%
Statistics	6	33%	63%	-30%

Analysis of Process categories

Process category	Number of questions	Student % correct	Standardisation % correct	Student / standardisation difference
Fluency in facts and procedures	13	31%	64%	-33%
Fluency in conceptual understanding	22	50%	64%	-14%
Problem solving	7	11%	34%	-23%
Mathematical reasoning	12	40%	57%	-17%

Implications for teaching and learning

- By comparing scores from a previous administration of *PTM* it is possible to categorise progress as expected, higher or lower than expected or much higher or much lower than expected.
 - María José took *PTM8B* in November 2024 and from then until now has made expected progress in maths.
- Reviewing the *Analysis of Curriculum content categories* will help to identify where there are specific strengths and weaknesses and to plan next steps.
- It is recommended that individual diagnostic assessments are administered as soon as possible to investigate more precisely where additional support is most needed and to decide on appropriate interventions. If the school uses CAT this may offer a further insight into María José's learning profile, which will inform the diagnosis.
- María José may need specific structured support to access the curriculum. This extra support should focus on the basics of number bonds, place value and number work through practical activities before moving on to a broader range of concepts or any degree of abstraction.
- Encourage María José to talk about calculations and answers whenever possible, to ascertain any misconceptions with reasoning skills.
- Make sure that María José begins to develop a written language for mathematics as well as developing mental agility. The setting out of written calculations in the correct way is fundamental to success and can aid understanding; for example, an understanding of place value is consolidated by setting out calculations in columns. The use of units in answers to practical problems consolidates an understanding of length, weight and other metrics, and serves to underline the difference between metrics such as length and area.
- Developing the written ability to use symbols such as ':' for ratios and the '=' sign correctly is also an important fundamental for success. If algebra has been introduced it is important that María José understands the difference between an 'equation' and an 'expression' and the differences in use of the '=' in each case.
- Check that language is not a barrier by using suitable but varied vocabulary; use practical apparatus and keep the interventions either one-to-one or in a very small group in order to build confidence. Make time every day to practise these skills to develop confidence. Provide suitable equipment for María José to manipulate and explore how and why a calculation strategy works, which will help María José to describe and visualise or 'see' the method working. The equipment can include objects like counters, interlocking cubes, coins, counting sticks, bead strings, number lines, 100-squares, place-value cards, structural apparatus like Dienes blocks, diagrams of shapes divided into fractional parts, home-made packs of cards with numbers and operators on and so on.
- An interactive whiteboard can also be a powerful tool for manipulating images.

Name: María José Sánchez Arbizú		
School: Academica Británica Cuscatleca		
Group: 4th quin...		Sex: Female

Date of second test: 10/10/2025	Level: 9B	Age: 9:03

Analysis by question

The table below shows each question in the test and the pupil's response (correct/incorrect) compared with the group and standardisation average.

Question number	Curriculum category	Process category	Question content	Score (/x)	Group % correct	Standardisation % correct
MM1	Number	Fluency in facts and procedures	What is six doubled?	0 / 1	68	87
MM2	Number	Fluency in facts and procedures	Multiply three by seven.	0 / 1	52	63
MM3	Number	Fluency in conceptual understanding	Write in figures the number four thousand and thirty-six.	0 / 1	36	63
MM4	Number	Mathematical reasoning	A packet of forty-five sweets is shared equally between five people. How many sweets does each person get?	0 / 1	24	64
MM5	Number	Fluency in facts and procedures	A cake is cut into thirds. How many pieces are there?	0 / 1	64	56
MM6	Measures	Fluency in conceptual understanding	My watch says half past two in the afternoon. What would a twenty four hour digital watch say?	0 / 1	4	28
MM7	Number	Mathematical reasoning	One car has four tyres. How many tyres do three cars have?	1 / 1	72	80
MM8	Number	Mathematical reasoning	There are six eggs in one box. How many eggs are there in seven boxes?	0 / 1	8	52
MM9	Number	Fluency in conceptual understanding	What is twenty-five take away thirteen?	1 / 1	64	66
MM10	Number	Fluency in facts and procedures	Write a multiple of six that is between fifteen and twenty-five.	0 / 1	16	44
MM11	Number	Fluency in conceptual understanding	Look at these numbers. Write down all the odd numbers.	0 / 1	52	64
MM12	Number	Fluency in facts and procedures	Add these numbers: forty-one, twenty-five and fourteen.	0 / 1	32	43
MM13	Number	Mathematical reasoning	There are thirty-two people in a restaurant. Thirteen are adults. How many are children?	0 / 1	28	36
MM14	Measures	Mathematical reasoning	I have twenty-seven pence. I want to spend thirty-five pence. How much more money do I need?	1 / 1	60	61
MM15	Measures	Fluency in facts and procedures	How many days are there in eight weeks?	0 / 1	16	47
AU1	Number	Fluency in conceptual understanding	Draw lines to connect the matching fractions.	2 / 2	86	89
AU2	Number	Fluency in conceptual understanding	What fraction of this shape is shaded?	0 / 1	36	78
AU3a	Number	Fluency in conceptual understanding	Which day had the lowest midnight temperature?	1 / 1	56	59

Question number	Curriculum category	Process category	Question content	Score (/x)	Group % correct	Standardisation % correct
AU3b	Number	Fluency in conceptual understanding	Which day had a midnight temperature 1 degree higher than Friday?	0 / 1	40	50
AU4	Number	Mathematical reasoning	On Sunday the midnight temperature was -2 degrees. The next day, the midnight temperature was 5 degrees higher. What was it?	0 / 1	48	49
AU5	Geometry	Fluency in facts and procedures	Name the 3 shapes that are labelled.	0 / 1	28	46
AU6a	Geometry	Fluency in facts and procedures	In which labelled shape are all the angles right angles?	0 / 1	48	60
AU6b	Geometry	Fluency in facts and procedures	In which labelled shape are all the angles greater than a right angle?	0 / 1	32	42
AU7	Number	Mathematical reasoning	Here are 3 more fraction sums that make 1 whole. Fill in the missing numbers.	0 / 2	22	62
AU8	Measures	Mathematical reasoning	Write the times in the correct boxes.	2 / 2	44	36
AU9	Statistics	Fluency in conceptual understanding	Put a circle round the country that has the least tigers.	1 / 1	64	83
AU10	Statistics	Fluency in conceptual understanding	Roughly how many tigers are there in Malaysia?	0 / 1	76	81
AU11	Statistics	Fluency in conceptual understanding	Put a circle round the 3 countries that have less than 500 tigers.	1 / 1	68	70
AU12a	Number	Fluency in conceptual understanding	Which number has 7 as its hundreds digit?	0 / 1	60	83
AU12b	Number	Fluency in conceptual understanding	Which number is 10 times bigger than 62?	1 / 1	40	63
AU12c	Number	Fluency in conceptual understanding	Which number is not a whole number?	1 / 1	60	70
AU12d	Number	Fluency in conceptual understanding	Which is the smallest number?	1 / 1	92	81
AU13	Number	Fluency in facts and procedures	Here is a number machine. Fill in the missing number.	1 / 1	84	74
AU14a	Number	Mathematical reasoning	Fill in the missing number.	0 / 1	68	66
AU14b	Number	Problem solving	What number comes out the same as it goes in?	0 / 1	28	40
AU15a	Number	Fluency in facts and procedures	Which is the biggest number?	1 / 1	88	94
AU15b	Number	Fluency in facts and procedures	Write in a number that is bigger than the biggest number here.	1 / 1	92	86
AU16a	Number	Fluency in facts and procedures	Which are the smallest two numbers in the list?	1 / 1	100	93
AU16b	Number	Mathematical reasoning	Write in any whole number that is between the 2 smallest numbers.	1 / 1	64	74
AU17	Measures	Fluency in conceptual understanding	Which two of these are equal to seventy pence?	1 / 2	54	68
AU18	Number	Fluency in conceptual understanding	What number is exactly between 41 and 55?	0 / 1	36	31
AU19	Number	Fluency in conceptual understanding	What number is exactly between 4.5 and 5.5?	1 / 1	48	51
AU20	Number	Fluency in conceptual understanding	What number is exactly halfway between $\frac{2}{7}$ and $\frac{4}{7}$?	1 / 1	56	71

Question number	Curriculum category	Process category	Question content	Score (/x)	Group % correct	Standardisation % correct
AU21	Geometry	Problem solving	Write the letters of each shape into the correct boxes.	0 / 3	28	31
AU22	Number	Mathematical reasoning	Now choose 4 different numbers to show more multiplications with the answer 32.	0 / 2	36	47
AU23	Measures	Fluency in conceptual understanding	At the bank, Mr Smith changes a £10 note for 20p pieces. How many 20p pieces does he get?	0 / 1	16	29
AU24	Number	Mathematical reasoning	What is the smallest possible number you can make using all 4 of these cards?	1 / 1	76	84
AU25	Number	Problem solving	Arrange the cards to make 2 numbers whose sum is 74.	0 / 1	48	57
AU26	Number	Problem solving	Arrange the cards to make 2 numbers whose difference is 26.	1 / 1	32	35
AU27a	Number	Problem solving	How many stickers will be left when she has made all the cards?	0 / 1	16	21
AU27b	Number	Problem solving	How many more invitations can she make with the left-over stickers?	0 / 1	8	24
AU28	Statistics	Fluency in conceptual understanding	How many babies were at the medical centre on that Wednesday?	0 / 1	20	40
AU29	Statistics	Fluency in conceptual understanding	Put an x on the graph in question 17 to show John's heartbeat.	0 / 1	56	70
AU30	Statistics	Problem solving	Which 2 of these age groups could Erin be in?	0 / 1	8	33
