## Analysis of Curriculum content categories

| Curriculum content category | Number of questions | Student % correct | Standardisation % correct | Student / standardisation difference |
|-----------------------------|---------------------|-------------------|---------------------------|--------------------------------------|
| Number                      | 38                  | 29%               | 62%                       | -33%                                 |
| Measurement                 | 6                   | 13%               | 47%                       | -34%                                 |
| Geometry                    | 4                   | 50%               | 40%                       | 10%                                  |
| Statistics                  | 6                   | 50%               | 63%                       | -13%                                 |

## Analysis of Process categories

| Process category                    | Number of questions | Student % correct | Standardisation % correct | Student / standardisation difference |
|-------------------------------------|---------------------|-------------------|---------------------------|--------------------------------------|
| Fluency in facts and procedures     | 13                  | 77%               | 64%                       | 13%                                  |
| Fluency in conceptual understanding | 22                  | 25%               | 64%                       | -39%                                 |
| Problem solving                     | 7                   | 11%               | 34%                       | -23%                                 |
| Mathematical reasoning              | 12                  | 13%               | 57%                       | -44%                                 |

## Implications for teaching and learning

---

- By comparing scores from a previous administration of *PTM* it is possible to categorise progress as expected, higher or lower than expected or much higher or much lower than expected.
  - Mateo took *PTM8B* in November 2024 and from then until now has made expected progress in maths.
- Reviewing the *Analysis of Curriculum content categories* will help to identify where there are specific strengths and weaknesses and to plan next steps.
- It is recommended that individual diagnostic assessments are administered as soon as possible to investigate more precisely where additional support is most needed and to decide on appropriate interventions. If the school uses CAT this may offer a further insight into Mateo's learning profile, which will inform the diagnosis.
- Mateo may need specific structured support to access the curriculum. This extra support should focus on the basics of number bonds, place value and number work through practical activities before moving on to a broader range of concepts or any degree of abstraction.
- Encourage Mateo to talk about calculations and answers whenever possible, to ascertain any misconceptions with reasoning skills.
- Make sure that Mateo begins to develop a written language for mathematics as well as developing mental agility. The setting out of written calculations in the correct way is fundamental to success and can aid understanding; for example, an understanding of place value is consolidated by setting out calculations in columns. The use of units in answers to practical problems consolidates an understanding of length, weight and other metrics, and serves to underline the difference between metrics such as length and area.
- Developing the written ability to use symbols such as ':' for ratios and the '=' sign correctly is also an important fundamental for success. If algebra has been introduced it is important that Mateo understands the difference between an 'equation' and an 'expression' and the differences in use of the '=' in each case.
- Check that language is not a barrier by using suitable but varied vocabulary; use practical apparatus and keep the interventions either one-to-one or in a very small group in order to build confidence. Make time every day to practise these skills to develop confidence. Provide suitable equipment for Mateo to manipulate and explore how and why a calculation strategy works, which will help Mateo to describe and visualise or 'see' the method working. The equipment can include objects like counters, interlocking cubes, coins, counting sticks, bead strings, number lines, 100-squares, place-value cards, structural apparatus like Dienes blocks, diagrams of shapes divided into fractional parts, home-made packs of cards with numbers and operators on and so on.
- An interactive whiteboard can also be a powerful tool for manipulating images.

## Analysis by question

The table below shows each question in the test and the pupil's response (correct/incorrect) compared with the group and standardisation average.

| Question number | Curriculum category | Process category                    | Question content                                                                                           | Score (/x) | Group % correct | Standardisation % correct |
|-----------------|---------------------|-------------------------------------|------------------------------------------------------------------------------------------------------------|------------|-----------------|---------------------------|
| MM1             | Number              | Fluency in facts and procedures     | What is six doubled?                                                                                       | 1 / 1      | 72              | 87                        |
| MM2             | Number              | Fluency in facts and procedures     | Multiply three by seven.                                                                                   | 1 / 1      | 56              | 63                        |
| MM3             | Number              | Fluency in conceptual understanding | Write in figures the number four thousand and thirty-six.                                                  | 0 / 1      | 48              | 63                        |
| MM4             | Number              | Mathematical reasoning              | A packet of forty-five sweets is shared equally between five people. How many sweets does each person get? | 0 / 1      | 20              | 64                        |
| MM5             | Number              | Fluency in facts and procedures     | A cake is cut into thirds. How many pieces are there?                                                      | 1 / 1      | 68              | 56                        |
| MM6             | Measures            | Fluency in conceptual understanding | My watch says half past two in the afternoon. What would a twenty four hour digital watch say?             | 0 / 1      | 4               | 28                        |
| MM7             | Number              | Mathematical reasoning              | One car has four tyres. How many tyres do three cars have?                                                 | 0 / 1      | 60              | 80                        |
| MM8             | Number              | Mathematical reasoning              | There are six eggs in one box. How many eggs are there in seven boxes?                                     | 0 / 1      | 12              | 52                        |
| MM9             | Number              | Fluency in conceptual understanding | What is twenty-five take away thirteen?                                                                    | 0 / 1      | 48              | 66                        |
| MM10            | Number              | Fluency in facts and procedures     | Write a multiple of six that is between fifteen and twenty-five.                                           | 0 / 1      | 20              | 44                        |
| MM11            | Number              | Fluency in conceptual understanding | Look at these numbers. Write down all the odd numbers.                                                     | 0 / 1      | 48              | 64                        |
| MM12            | Number              | Fluency in facts and procedures     | Add these numbers: forty-one, twenty-five and fourteen.                                                    | 0 / 1      | 16              | 43                        |
| MM13            | Number              | Mathematical reasoning              | There are thirty-two people in a restaurant. Thirteen are adults. How many are children?                   | 0 / 1      | 12              | 36                        |
| MM14            | Measures            | Mathematical reasoning              | I have twenty-seven pence. I want to spend thirty-five pence. How much more money do I need?               | 1 / 1      | 48              | 61                        |
| MM15            | Measures            | Fluency in facts and procedures     | How many days are there in eight weeks?                                                                    | 0 / 1      | 0               | 47                        |
| AU1             | Number              | Fluency in conceptual understanding | Draw lines to connect the matching fractions.                                                              | 2 / 2      | 90              | 89                        |
| AU2             | Number              | Fluency in conceptual understanding | What fraction of this shape is shaded?                                                                     | 0 / 1      | 40              | 78                        |
| AU3a            | Number              | Fluency in conceptual understanding | Which day had the lowest midnight temperature?                                                             | 0 / 1      | 48              | 59                        |

| Question number | Curriculum category | Process category                    | Question content                                                                                                             | Score (/x) | Group % correct | Standardisation % correct |
|-----------------|---------------------|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------|------------|-----------------|---------------------------|
| AU3b            | Number              | Fluency in conceptual understanding | Which day had a midnight temperature 1 degree higher than Friday?                                                            | 0 / 1      | 40              | 50                        |
| AU4             | Number              | Mathematical reasoning              | On Sunday the midnight temperature was -2 degrees. The next day, the midnight temperature was 5 degrees higher. What was it? | 0 / 1      | 36              | 49                        |
| AU5             | Geometry            | Fluency in facts and procedures     | Name the 3 shapes that are labelled.                                                                                         | 1 / 1      | 40              | 46                        |
| AU6a            | Geometry            | Fluency in facts and procedures     | In which labelled shape are all the angles right angles?                                                                     | 1 / 1      | 40              | 60                        |
| AU6b            | Geometry            | Fluency in facts and procedures     | In which labelled shape are all the angles greater than a right angle?                                                       | 1 / 1      | 12              | 42                        |
| AU7             | Number              | Mathematical reasoning              | Here are 3 more fraction sums that make 1 whole. Fill in the missing numbers.                                                | 0 / 2      | 14              | 62                        |
| AU8             | Measures            | Mathematical reasoning              | Write the times in the correct boxes.                                                                                        | 0 / 2      | 32              | 36                        |
| AU9             | Statistics          | Fluency in conceptual understanding | Put a circle round the country that has the least tigers.                                                                    | 1 / 1      | 80              | 83                        |
| AU10            | Statistics          | Fluency in conceptual understanding | Roughly how many tigers are there in Malaysia?                                                                               | 1 / 1      | 76              | 81                        |
| AU11            | Statistics          | Fluency in conceptual understanding | Put a circle round the 3 countries that have less than 500 tigers.                                                           | 1 / 1      | 64              | 70                        |
