Group report for teachers

School: Academica Británica Cuscatleca	
Group: 5TH TRUSCOTT OCT 25	No. of students: 24
Date of test: 13/10/2025	Form: B

What is Progress Test in Maths?

The *PTM* series consists of two Forms: the original form (Form A), and the new form (Form B). Form A consists of 12 tests: 10 tests covering the age range 5 to 15+ years (*Progress Test in Maths* 5 to 15), plus an additional test for pupils aged between 11 and 12 years, which can be used as a transition test on entry to secondary education (*Progress Test in Maths* 11T). Form B consists of 9 tests covering the age ranges 6 to 15+ years.

Why use Progress Test in Maths?

Progress Test in Maths (PTM) can be used for both formative and summative purposes to identify strengths and weaknesses in students' maths skills and knowledge, and to plan teaching and learning strategies, targeted support, and extension work for groups and individuals. Using *PTM* year-on-year provides accurate and reliable information on students' attainment and progress in key maths competencies.

In addition to helping the teacher track the progress of individual students, *PTM* allows the school to compile an essential database of maths attainment. If *Progress Test in Maths* is used from start of school on an annual basis, the resulting profile of student and group attainment can help support the school's aim of raising standards in maths.

The Standard Age Score (SAS) is a reliable measure for ensuring that monitoring is accurate and based on relevant test content, and that students are making good progress.

Relationship between scores

Description	Very Low		Below Average		Average			Above Average		Very High			
Stanine (ST)	1	2	3	4	5	6	7	8	9				
Standard Age Score (SAS)	70	80	90	100	110	120	130						
Percentile Rank (PR)	1	5	10	20	30	40	50	60	70	80	90	95	99

School: Academica Británica Cuscatleca**Group:** 5TH TRUSCOTT OCT 25**No. of students:** 24**Date of test:** 13/10/2025**Form:** B

Scores for the group (by last name)

Student name	Class	Age at test (yrs:mths)	No. attempted (/58)	SAS	SAS (with 90% confidence bands)										Overall ST	PR	GR (/24)	End of KS2 indicator	Progress Category
					60	70	80	90	100	110	120	130	140						
Marco Andrés Aguilar Medrano	5th Trus...	11:03	56	94											4	34	=12	101	Expected
Lourdes Amaya Sibrián	5th Trus...	11:03	58	117											7	87	3	111	Higher

Analysis of group scores (all students)

The table and bar chart below show the distribution of scores for the group against the standardisation average.

Description	Very low	Below average		Average			Above average		Very high
SAS bands	<74	74–81	82–88	89–96	97–103	104–111	112–118	119–126	>126
Standardisation average	4%	7%	12%	17%	20%	17%	12%	7%	4%
All students	4%	4%	13%	42%	8%	8%	13%	8%	0%

The table below shows the mean scores with confidence bands for the group against the standardisation average.

	No. of students	Mean SAS	SAS (with 90% confidence bands)											
			60	70	80	90	100	110	120	130	140			
Standardisation average	-	100.0												
All students	24	97.3												

School: Academica Británica Cuscatleca	
Group: 5TH TRUSCOTT OCT 25	No. of students: 24
Date of test: 13/10/2025	Form: B

Analysis of group scores (by gender)

The table and bar chart below show the distribution of scores for the group, males and females, against the standardisation average.

Description	Very low	Below average		Average			Above average		Very high
SAS bands	<74	74–81	82–88	89–96	97–103	104–111	112–118	119–126	>126
Standardisation average	4%	7%	12%	17%	20%	17%	12%	7%	4%
All students	4%	4%	13%	42%	8%	8%	13%	8%	0%
Males	0%	0%	0%	45%	9%	18%	18%	9%	0%
Females	8%	8%	23%	38%	8%	0%	8%	8%	0%

The mean standard age score for males is not significantly different from that of the females.

The table below shows the mean scores with confidence bands for the group, males and females, against the standardisation average.

	No. of students	Mean SAS	SAS (with 90% confidence bands)											
			60	70	80	90	100	110	120	130	140			
Standardisation average	-	100.0												
All students	24	97.3												
Males	11	102.8												
Females	13	92.7

Date of test: 13/10/2025	Form: B

Analysis of group scores (by Process category)

The table and chart below show the percentage of questions answered correctly by all students compared with those for the standardisation average.

Process category	Number of questions	Group % correct	Standardisation % correct	Difference
Fluency in facts and procedures	9	58%	63%	-5%
Fluency in conceptual understanding	22	46%	52%	-6%
Problem solving	5	43%	43%	0%
Mathematical reasoning	22	47%	50%	-3%

School: Academica Británica Cuscatleca	
Group: 5TH TRUSCOTT OCT 25	No. of students: 24
Date of test: 13/10/2025	Form: B

Analysis of group scores (by question)

The chart below shows each question and the percentage correct for the group compared with the standardisation average.

School: Academica Británica Cuscatleca	
Group: 5TH TRUSCOTT OCT 25	No. of students: 24
Date of test: 13/10/2025	Form: B

The table below shows each question and the percentage correct for the group compared with the standardisation average (by standardisation % correct).

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
MM1	Number	Fluency in facts and procedures	Write in figures the number four hundred and thirty-seven.	79	90	-11
MM9	Number	Fluency in conceptual understanding	I have weeded seventy percent of my path. What percentage is left to weed?	88	89	-1
AU4	Statistics	Fluency in conceptual understanding	Which is the youngest cat?	79	83	-4
AU6	Statistics	Problem solving	Write the labels in the correct spaces.	88	82	6
AU9	Statistics	Mathematical reasoning	Write the labels in the spaces on the correct lines.	92	78	14
MM4	Number	Mathematical reasoning	Write in figures five hundred and seventy-five correct to the nearest hundred.	88	77	11
AU14a	Number	Fluency in conceptual understanding	Circle the name of the city that is warmest in winter.	88	77	11
AU8	Statistics	Fluency in facts and procedures	How many pencils, pieces of paper and pens does she need for 10 pupils?	75	76	-1
MM2	Number	Fluency in facts and procedures	What number is halfway between three point eight and five point eight?	75	73	2
MM5	Number	Fluency in conceptual understanding	Add two point two three and one point zero one.	58	72	-14
AU28a	Number	Fluency in conceptual understanding	Sort the cities in order of distance from London.	69	71	-2
AU33i	Statistics	Mathematical reasoning	Draw the correct scores on the bar chart.	63	71	-8
MM10	Number	Fluency in facts and procedures	Tom has sixteen identical socks. How many pairs of socks does he have?	63	70	-7
MM12	Number	Fluency in conceptual understanding	The temperature was minus three degrees Celcius. It went up by ten degrees. Write the new temperature.	88	69	19
MM13	Number	Mathematical reasoning	Forty-eight strawberries are shared between six people. How many does each person get?	54	67	-13
AU1	Number	Fluency in conceptual understanding	How far did he run in total on Tuesday and Thursday?	71	67	4
AU29	Geometry	Fluency in facts and procedures	Which is the smallest angle?	75	66	9
AU7a	Number	Problem solving	How many packs of books does Miss Begum need to buy?	71	62	9
AU14b	Number	Mathematical reasoning	Cardiff is 8 degrees warmer than Oslo. What is the temperature in Cardiff?	79	61	18
AU19a	Number	Fluency in conceptual understanding	Write these fractions in the correct boxes.	52	61	-9
AU16a	Number	Fluency in conceptual understanding	Which is the odd one out?	33	59	-26

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
AU18b	Number	Mathematical reasoning	Which rod is 50 per cent of rod E?	46	57	-11
AU25	Number	Mathematical reasoning	Put the correct numbers in the spaces.	50	57	-7
AU21	Geometry	Mathematical reasoning	Circle all the squares that are cut into 2 equal pieces.	65	56	9
AU19b	Number	Mathematical reasoning	Make up one more fraction for each box.	42	55	-13
MM3	Number	Fluency in conceptual understanding	Write one quarter as a percentage.	42	54	-12
AU33ii	Statistics	Mathematical reasoning	Draw the correct scores on the bar chart.	50	53	-3
MM14	Number	Fluency in conceptual understanding	One fifth of a number is four. What is the number?	29	52	-23
AU30	Geometry	Fluency in facts and procedures	Which is the largest angle?	58	52	6
MM7	Measures	Mathematical reasoning	How many weeks are forty-nine days?	29	51	-22
MM6	Number	Fluency in conceptual understanding	There are thirty-one days in January. After the seventeenth of January, how many days are left until the end of the month?	50	50	0
MM11	Measures	Fluency in facts and procedures	Bob spends three pounds seventy pence. He pays with a five-pound note. How much change does he get?	46	49	-3
MM8	Number	Fluency in conceptual understanding	What is forty-nine multiplied by a hundred?	54	48	6
AU20	Number	Problem solving	How many adults are needed on the trip?	50	48	2
AU5	Statistics	Mathematical reasoning	What is the difference in mass between the lightest cat and the heaviest cat?	38	46	-8
AU31	Geometry	Fluency in facts and procedures	Which 2 angles are reflex angles?	46	46	0
MM15	Measures	Fluency in facts and procedures	A TV programme starts at ten past five and ends at ten past seven. How many minutes does the programme last?	8	45	-37
AU24	Number	Mathematical reasoning	How many boxes do they need to buy? How many bags of crisps will be left over?	58	44	14
AU2	Number	Fluency in conceptual understanding	How much further did he run on Saturday than on Wednesday?	21	41	-20
AU11	Measures	Mathematical reasoning	Joe buys 4 bananas. What is the smallest amount they can weigh altogether?	54	41	13
AU32	Geometry	Fluency in conceptual understanding	Which 2 angles together would make 1 complete turn?	25	41	-16
AU10	Number	Fluency in conceptual understanding	How much shorter do they need to be?	25	40	-15
AU22	Geometry	Mathematical reasoning	Circle all the squares where the cut is a line of symmetry.	25	40	-15
AU7b	Number	Fluency in conceptual understanding	How much will she spend?	58	39	19
AU28b	Number	Mathematical reasoning	How much further away from London is Honolulu than Miami?	21	39	-18
AU16b	Number	Mathematical reasoning	Write another fraction with the same value as the other 4 fractions.	25	38	-13

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
AU18a	Number	Mathematical reasoning	Which rod is two-thirds of rod B?	21	38	-17
AU33iii	Statistics	Mathematical reasoning	Draw the correct scores on the bar chart.	46	38	8
AU26	Measures	Fluency in conceptual understanding	What is the perimeter of her vegetable garden?	38	36	2
AU15	Measures	Fluency in conceptual understanding	How many cubes does he use? Use the cards to show how to work it out. Write your answer	17	33	-16
AU27a	Measures	Mathematical reasoning	Which diagram shows a vegetable garden that has the same area, but a smaller perimeter?	21	33	-12
AU27b	Measures	Fluency in conceptual understanding	What is the perimeter of the new vegetable garden?	13	29	-16
AU3	Number	Fluency in conceptual understanding	How far did David run on Wednesday?	42	27	15
AU12	Measures	Mathematical reasoning	Joe buys 1 banana, 10 grapes and 2 plums. What is the largest amount they can weigh altogether?	29	27	2
AU18c	Number	Mathematical reasoning	Fill in the fraction.	17	25	-8
AU13	Measures	Problem solving	Joe buys 500 grams of grapes. What is the largest number of grapes he can get?	21	23	-2
AU17	Number	Problem solving	How many children are there at the camp?	15	22	-7
AU23	Number	Fluency in conceptual understanding	Work out the other ways and fill in the gaps below.	13	18	-5

School: Academica Británica Cuscatleca	
Group: 5TH TRUSCOTT OCT 25	No. of students: 24
Date of test: 13/10/2025	Form: B

The table below shows each question and the percentage correct for the group compared with the standardisation average (by group / standardisation difference).

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
MM12	Number	Fluency in conceptual understanding	The temperature was minus three degrees Celcius. It went up by ten degrees. Write the new temperature.	88	69	19
AU7b	Number	Fluency in conceptual understanding	How much will she spend?	58	39	19
AU14b	Number	Mathematical reasoning	Cardiff is 8 degrees warmer than Oslo. What is the temperature in Cardiff?	79	61	18
AU3	Number	Fluency in conceptual understanding	How far did David run on Wednesday?	42	27	15
AU9	Statistics	Mathematical reasoning	Write the labels in the spaces on the correct lines.	92	78	14
AU24	Number	Mathematical reasoning	How many boxes do they need to buy? How many bags of crisps will be left over?	58	44	14
AU11	Measures	Mathematical reasoning	Joe buys 4 bananas. What is the smallest amount they can weigh altogether?	54	41	13
MM4	Number	Mathematical reasoning	Write in figures five hundred and seventy-five correct to the nearest hundred.	88	77	11
AU14a	Number	Fluency in conceptual understanding	Circle the name of the city that is warmest in winter.	88	77	11
AU7a	Number	Problem solving	How many packs of books does Miss Begum need to buy?	71	62	9
AU21	Geometry	Mathematical reasoning	Circle all the squares that are cut into 2 equal pieces.	65	56	9
AU29	Geometry	Fluency in facts and procedures	Which is the smallest angle?	75	66	9
AU33iii	Statistics	Mathematical reasoning	Draw the correct scores on the bar chart.	46	38	8
MM8	Number	Fluency in conceptual understanding	What is forty-nine multiplied by a hundred?	54	48	6
AU6	Statistics	Problem solving	Write the labels in the correct spaces.	88	82	6
AU30	Geometry	Fluency in facts and procedures	Which is the largest angle?	58	52	6
AU1	Number	Fluency in conceptual understanding	How far did he run in total on Tuesday and Thursday?	71	67	4
MM2	Number	Fluency in facts and procedures	What number is halfway between three point eight and five point eight?	75	73	2
AU12	Measures	Mathematical reasoning	Joe buys 1 banana, 10 grapes and 2 plums. What is the largest amount they can weigh altogether?	29	27	2
AU20	Number	Problem solving	How many adults are needed on the trip?	50	48	2
AU26	Measures	Fluency in conceptual understanding	What is the perimeter of her vegetable garden?	38	36	2

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
MM6	Number	Fluency in conceptual understanding	There are thirty-one days in January. After the seventeenth of January, how many days are left until the end of the month?	50	50	0
AU31	Geometry	Fluency in facts and procedures	Which 2 angles are reflex angles?	46	46	0
MM9	Number	Fluency in conceptual understanding	I have weeded seventy percent of my path. What percentage is left to weed?	88	89	-1
AU8	Statistics	Fluency in facts and procedures	How many pencils, pieces of paper and pens does she need for 10 pupils?	75	76	-1
AU13	Measures	Problem solving	Joe buys 500 grams of grapes. What is the largest number of grapes he can get?	21	23	-2
AU28a	Number	Fluency in conceptual understanding	Sort the cities in order of distance from London.	69	71	-2
MM11	Measures	Fluency in facts and procedures	Bob spends three pounds seventy pence. He pays with a five-pound note. How much change does he get?	46	49	-3
AU33ii	Statistics	Mathematical reasoning	Draw the correct scores on the bar chart.	50	53	-3
AU4	Statistics	Fluency in conceptual understanding	Which is the youngest cat?	79	83	-4
AU23	Number	Fluency in conceptual understanding	Work out the other ways and fill in the gaps below.	13	18	-5
MM10	Number	Fluency in facts and procedures	Tom has sixteen identical socks. How many pairs of socks does he have?	63	70	-7
AU17	Number	Problem solving	How many children are there at the camp?	15	22	-7
AU25	Number	Mathematical reasoning	Put the correct numbers in the spaces.	50	57	-7
AU5	Statistics	Mathematical reasoning	What is the difference in mass between the lightest cat and the heaviest cat?	38	46	-8
AU18c	Number	Mathematical reasoning	Fill in the fraction.	17	25	-8
AU33i	Statistics	Mathematical reasoning	Draw the correct scores on the bar chart.	63	71	-8
AU19a	Number	Fluency in conceptual understanding	Write these fractions in the correct boxes.	52	61	-9
MM1	Number	Fluency in facts and procedures	Write in figures the number four hundred and thirty-seven.	79	90	-11
AU18b	Number	Mathematical reasoning	Which rod is 50 per cent of rod E?	46	57	-11
MM3	Number	Fluency in conceptual understanding	Write one quarter as a percentage.	42	54	-12
AU27a	Measures	Mathematical reasoning	Which diagram shows a vegetable garden that has the same area, but a smaller perimeter?	21	33	-12
MM13	Number	Mathematical reasoning	Forty-eight strawberries are shared between six people. How many does each person get?	54	67	-13
AU16b	Number	Mathematical reasoning	Write another fraction with the same value as the other 4 fractions.	25	38	-13
AU19b	Number	Mathematical reasoning	Make up one more fraction for each box.	42	55	-13
MM5	Number	Fluency in conceptual understanding	Add two point two three and one point zero one.	58	72	-14

Question number	Curriculum category	Process category	Question content	Group % correct	Standardisation % correct	Group / standardisation difference
AU10	Number	Fluency in conceptual understanding	How much shorter do they need to be?	25	40	-15
AU22	Geometry	Mathematical reasoning	Circle all the squares where the cut is a line of symmetry.	25	40	-15
AU15	Measures	Fluency in conceptual understanding	How many cubes does he use? Use the cards to show how to work it out. Write your answer	17	33	-16
AU27b	Measures	Fluency in conceptual understanding	What is the perimeter of the new vegetable garden?	13	29	-16
AU32	Geometry	Fluency in conceptual understanding	Which 2 angles together would make 1 complete turn?	25	41	-16
AU18a	Number	Mathematical reasoning	Which rod is two-thirds of rod B?	21	38	-17
AU28b	Number	Mathematical reasoning	How much further away from London is Honolulu than Miami?	21	39	-18
AU2	Number	Fluency in conceptual understanding	How much further did he run on Saturday than on Wednesday?	21	41	-20
MM7	Measures	Mathematical reasoning	How many weeks are forty-nine days?	29	51	-22
MM14	Number	Fluency in conceptual understanding	One fifth of a number is four. What is the number?	29	52	-23
AU16a	Number	Fluency in conceptual understanding	Which is the odd one out?	33	59	-26
MM15	Measures	Fluency in facts and procedures	A TV programme starts at ten past five and ends at ten past seven. How many minutes does the programme last?	8	45	-37

Student profiles

To understand how different pupils have performed on *PTM*, it may be helpful to group together those with a different profile of scores. Although it is important to focus on overall performance, it is possible to differentiate between pupils whose performance is 'Low' (Stanines 1, 2 & 3), 'Medium' (Stanines 4, 5 & 6) and 'High' (Stanines 7, 8 & 9).

Whilst it may be helpful to consider which pupils fall into which category, this information must be treated with caution as this is based on a single snapshot in time. It should be remembered that children may perform differently on another occasion when being observed by a teacher, and that progression across the different mathematical disciplines will not necessarily be even.

Low performance

- These pupils are performing below national age-related expectations as a group, and their scores vary from very low to below average. It is recommended that individual diagnostic assessments are administered as soon as possible to investigate more precisely where additional support is most needed and to decide on appropriate interventions.
- Pupils with a low score will need to revisit concrete operational methods in order to establish and consolidate an understanding of number (cardinality and ordinality) before moving on to higher order concepts. Concrete objects and measuring tools should be used in practical activities. Teaching should also involve using a range of measures to describe and compare different quantities such as length, mass, capacity/volume, time and money. An ability to estimate and perform 'real life' calculations requires practice and repetition as well as a basic understanding of the decimal system.
- Pupils should be challenged to work as often as possible without the aid of a calculator. Regular practice at mental mathematics should be provided and starter activities designed to stimulate mental agility will help them to overcome any fear of being without a calculator, as well as developing their mental abilities.
- Pupils should be encouraged to write down each step in their calculations to explain how they arrive at their answer using the correct mathematical vocabulary. In this way they can develop their language of mathematics, in particular their abilities to reason, explain and justify, which, in turn, will help them to develop into confident problem solvers. They will also be challenged to see that there are sometimes multiple approaches to arriving at the right answer. This will help development in both the written and mental contexts.
- Pupils should be encouraged to play mathematical games, perform exercises in imagining to develop an understanding of number or shape and space, build confidence through practical applications to real life situations, and practice routine calculations to consolidate their knowledge of multiplication tables. An emphasis on practice will always aid fluency and build confidence.

Students:

Marianna Búcaro Aieta
Stella Menjívar Rosales

Fernanda Contreras Patiño
Valentina María Orellana Carballo

Valentina Handal Kattán

Medium performance

- These pupils, as a group, demonstrate a performance that is broadly average and in line with national age-related expectations across the curriculum for mathematics. It is recommended that individual diagnostic assessments are made to investigate more precisely where strengths and weaknesses in different aspects of mathematics lie, and therefore where additional support or greater challenge is most needed.
- Pupils in this category will generally demonstrate the ability to work through calculations following learned methods, rather than demonstrate an intuitive flare for skipping steps to get to the answer. Their approach is likely to be linear and they will prefer to work out every calculation on paper or with a calculator, rather than relying on their mental abilities.
- Pupils need to be encouraged to develop the more formal written language of mathematics. They should focus on the use of the '=' sign, the inclusion of units in answers and they should be encouraged to 'proof read' their answers carefully to check that they make sense. A good example arises once pupils have been introduced to algebra. It is important that they understand the difference between an 'expression' and an 'equation' and can use the '=' sign correctly in both contexts.
- Getting pupils to record their ideas and discuss their thinking out loud helps the teacher to 'see' their thought processes and therefore assess their understanding and identify any misconceptions they may have. It not only helps to consolidate their understanding, but also help pupils to develop their language of mathematics. They will be required to reason, explain, and justify, which are critical skills in developing mathematical acuity. They will also be challenged to see that there are sometimes multiple approaches to arriving at the right answer, as in the example above. This will help development in both written and mental contexts.

Medium performance

Students:

Marco Andrés Aguilar Medrano

Sebastián Eduardo Castillo Hernández

Mariana Cienfuegos Cabrera

Ariel Alejandro Escobar Martínez

Andrés García Salazar

Jacobó Abraham Handal Alabí

Sofía Beatriz Hernández Alvarenga

Rafael Antonio Mena Munguía

Elena José Molina Clautier

Carlos Alfredo Orantes Canjura

Daniela Pineda Salazar

Manuel Eduardo Ruiz Rodríguez

Valeria Margarita Sancho Cruz

Valeria Denisse Viana Hananía

High performance

- These pupils are performing above or significantly above national related expectation for their age group and, as a group, their scores vary from above average to very high. Fluency and agility are better developed for this group than others and they are likely to be more confident in their manipulation of numbers, measures and shapes. They can make connections between measure and number and are developing a secure understanding of fractions.
- Pupils with a high score will want and need to go beyond the answer to a particular problem to raise questions which the answer itself raises. They should be encouraged to discuss different approaches to arriving at the correct answer and to seek generalisations or counter examples depending on the context. Reasoning and conversation lie at the heart of developing problem solving skills; they afford the opportunity to conjecture, hypothesise and test whilst promoting perseverance and resilience.
- Next steps should include opportunities to stretch and develop conceptual understanding, to increase mental agility and to progress the development of formal written mathematics. This can be done by asking pupils to explain methodology and justify answers and procedures. Give them the opportunity to change questions (for example by saying 'What if.....' and then altering some aspect of the set question), to ensure that they develop problem solving skills of reasoning and generalising.
- Provide practice time and frequent opportunities for these pupils to use one or more facts that they already know to work out more facts, and engage them in discussion (perhaps by also providing discussion using common misconceptions). Give opportunities for them to explain their methods and strategies to you and their peers, which will help them to make connections, and develop both their problem solving abilities and their language of mathematics, thus improving both mental agility and written fluency.
- Offering opportunities to be the teacher to a group of other pupils is a good way to help them develop their own understanding.

Julian Rafael Gonzales

Pablo Orantes Arango

Daniel Alejandro Pineda Olivo

School: Academica Británica Cuscatleca	
Group: 5TH TRUSCOTT OCT 25	No. of students: 24
Date(s) of first test: 14/11/2024 – 26/11/2024	Level: 9B
Date(s) of second test: 13/10/2025	Level: 10B

Progress profiles

The SAS for the first and second administrations of the test are shown in the diagram. Students who are considered to be making expected progress are in the white band. Students making lower and much lower than expected progress are in the light and the dark orange band and those making higher and much higher than expected progress are in the light and the dark green band respectively.

Note that only those students who have completed two valid administrations of *PTM* are able to have performance compared and therefore progress reported in this section.

- Much higher than expected progress
- Higher than expected progress
- Expected progress
- Lower than expected progress
- Much lower than expected progress
- Males
- Females

Progress scores for the group (by last name)

The table below shows the SAS for the first and second administrations of the test and the resulting SAS difference and progress category. Note that only those students who have completed two valid administrations of *PTM* are able to have performance compared and therefore progress reported in this section.

Student name	First administration SAS	Second administration SAS	SAS difference	Progress category
Marco Andrés Aguilar Medrano	86	94	8	Expected
Lourdes Amaya Sibrián	108	117	9	Higher
Marianna Búcaro Aieta	80	88	8	Expected
Sebastián Eduardo Castillo Hernández	91	89	-2	Lower
Arianna Valentina Cevallos Hernández	107	119	12	Much higher
Mariana Cienfuegos Cabrera	84	91	7	Expected
Fernanda Contreras Patiño	80	88	8	Expected
Ariel Alejandro Escobar Martínez	97	100	3	Expected
Andrés García Salazar	87	95	8	Expected
Julian Rafael Gonzales	108	113	5	Expected
Jacobo Abraham Handal Alabí	81	95	14	Higher
Valentina Handal Kattán	83	81	-2	Lower
Sofía Beatriz Hernández Alvarenga	89	98	9	Expected
Rafael Antonio Mena Munguía	104	106	2	Expected
Stella Menjivar Rosales	83	86	3	Expected
Elena José Molina Clautier	89	94	5	Expected
Pablo Orantes Arango	104	115	11	Higher
Carlos Alfredo Orantes Canjura	88	94	6	Expected
Valentina María Orellana Carballo	80	71	-9	Much lower
Daniel Alejandro Pineda Olivo	104	124	20	Much higher
Daniela Pineda Salazar	86	90	4	Expected
Manuel Eduardo Ruiz Rodríguez	100	106	6	Expected
Valeria Margarita Sancho Cruz	91	92	1	Expected
Valeria Denisse Viana Hananía	79	90	11	Expected
